I SYNOPSIS

PRINCIPLES IN CONTEMPORARY RESTORATIVE DENTISTRY

This course is designed for clinicians who would like an update on the current restorative option available to clinicians and patients. The days are structured to combine lectures and discussions as well as hands on application of the theory, in order to keep the days interesting and hone and develop new skills. The course is scheduled over seven months, with didactic teaching and emphasis on clinical skill development.

This course will give our delegates confidence in their knowledge and technical skills for the treatment of everything from a single posterior crown to understanding the principles of occlusion and full arch restorations.

This course is specifically aimed at clinicians, who would like to have more confidence to do better dentistry and to be proud of their work. The course is run by Dr Farid Monibi, specialist prosthodontist.

Participants will be awarded a certificate upon completion of this course. This course will provide 70 hours of verifiable CPD.

Mentoring and clinical coaching at 76 Harley Street will be available after the completion of the course.
